Career Objective

Motivated and detail-oriented,seeking a position in a reputed organization where I can apply my technical skills, enhance my knowledge, and contribute to the growth of the company while building a successful career.

S. No	Qualification	Institute	Board / University	Year	GPA or Percentage
1	12th Grade	Delhi public School	Central Board of Secondary Education	2021-2023	93.8%
2	10th Grade	Global Edge school	Central Board of Secondary Education.	2020	94%

Technical Skills

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js

Mobile Development: React Native, Expo

Databases: MongoDB, MySQL

Machine Learning: Scikit-learn, NumPy, Pandas, Logistic Regression, Model Evaluation

AI Concepts: RAG, LLM Integration, Prompt Engineering

Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Core Concepts: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Software Engineering

Academic Projects

- **AI-Based Placement & Internship Automation System**
  Developed a full-stack web application to automate the college placement process. The system enables administrators to create job drives, define eligibility criteria, and

manage student applications through different recruitment stages such as Applied, Shortlisted, Interview, and Selected. Implemented secure authentication using JWT and role-based access control. Incorporated Retrieval-Augmented Generation (RAG) concepts to support intelligent query handling for placement-related information.
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT

- **Sales Prediction Using Machine Learning**
  Built a machine learning model to predict sales based on historical data using regression techniques. Performed data preprocessing, exploratory data analysis, and feature engineering to improve model performance. Evaluated the model using metrics such as R^2 score and Mean Squared Error and visualized insights to support data-driven business decisions.
  Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib
- **Agrow – Smart Soil Analysis and Recommendation App**
  Developed a mobile application for soil health analysis and crop recommendations. The application analyzes soil nutrients, moisture levels, and texture to generate recommendations and risk alerts such as potential waterlogging conditions. Integrated Bluetooth Low Energy (BLE) for sensor-based data collection and implemented local storage for moisture trend visualization.
  Tech Stack: React Native, Expo, JavaScript, BLE, AsyncStorage

Achievements

- Secured First Place at InnoVision 2k24 organized by Gamma Club, competing among 122 registrations and 21 finalist teams. Presented “FoodGuard,” an AI-driven solution focused on enhancing food safety and hygiene standards through innovative technology-based monitoring and analysis. Recognized for innovation, practical impact, and strong problem-solving approach.

Experience

- **SQL Intern**
  MindClues | June 2025 – July 2025 (1 Month)
  Worked as a SQL Intern and developed an HR Automation System for the company to streamline employee data management and internal HR processes. Designed and optimized database schemas, wrote complex SQL queries, and implemented CRUD operations to manage employee records, attendance, and workflow tracking. Contributed to improving data organization, accuracy, and retrieval efficiency within the organization.
- **Full Stack Developer Intern**
  Sentiantal | February 2025 – May 2025 (3 Months)
  Worked as a Full Stack Developer and contributed to the development of “Agrow,” a smart soil analysis and recommendation application. Built and enhanced frontend features using React Native and implemented backend integrations for processing soil data. Worked on nutrient analysis, moisture tracking, and recommendation logic to generate crop suggestions and risk alerts such as potential waterlogging. Assisted in BLE-based sensor data integration and improved application structure for better scalability and performance.

Strengths

- Strong problem-solving and analytical skills
- Quick learner with adaptability to new technologies
- Ability to work effectively in team environment

Hobbies

- Exploring emerging technologies and AI trends
- Participating in hackathons and technical competitions
- Reading about innovation and startups
- Listening to music and creative content

DECLARATION:

I hereby declare that the above mentioned information is true to the best of my knowledge and that I will be responsible for any deviation from the truth of these facts.
